EXPLANATORY NOTES

1. In all the tables of imports and exports in this Report, the quantities and values are based upon the declarations of importers (import entries) and of exporters (export entries), as subsequently checked by Customs officials.

2. Weight, where shown, is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs tariff.

3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

4. In this Report are trade items such as "Internal combustion engines and parts", etc., etc., which show both quantities and values. In this item "Internal combustion engines and parts" the quantity represents the number of "Complete engines" only, while the value represents not only the value of the specified number of complete engines but also the value of all kinds of "Parts" of engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.

5. "Imports" means "Imports entered for Consumption". "Entered for Consumption" does not imply that the goods have been actually consumed in Canada, but that they have passed into the custody of the importer and that duty has been paid on the dutiable portion.

6. For statistical purposes, the value of merchandise imported, as shown in this Report, is the value as determined for Customs duty purposes. In most cases, this would be the invoice value of the goods converted to Canadian dollars at authorized exchange ratios. The value does not include charges such as freight, insurance, handling, duties or taxes.

7. "Exports of Canadian Produce" include not only articles of purely Canadian origin but also imported articles of foreign origin which have been changed in form or enhanced in value by further manufacture in Canada, such as sugar refined from imported raw sugar, and rubber goods made from imported unmanufactured rubber.

8. The value of "Exports of Canadian Produce" is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges.

9. "Exports of Foreign Produce" consist of "Imports entered for Consumption" (see no. 5 above), which have been exported from Canada in the same condition as when imported. The value is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges, when exported from Canada.

10. Imports into Canada are classified as received from the countries whence they were consigned to Canada. The countries of consignment are the countries from which the goods have come, without interruption of transit, except in the course of transshipment or transfer from one conveyance to another. The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to Canada. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England; Canadian statistics record such imports as coming from the United Kingdom.

NOTES EXPLICATIVES

1. Toutes les indications de volume et de valeur que l'on trouvera dans cet ouvrage sont basées sur les déclarations des importateurs et des exportateurs (documents d'importation et d'exportation), subséquemment vérifiées par les fonctionnaires des douanes.

2. Partout où il est question de poids, il s'agit du poids net des marchandises, c'est-à-dire que le poids des emballages, récipients, etc., n'y est pas compris, sauf certaines exceptions énumérées au tarif des douanes.

3. L'expression "ton" signifie 2,000 livres et "cwt." (ou quintal) 100 livres avoirdupois. Lorsqu'on se sert d'autres unités, il convient d'adopter le standard impérial de poids et mesures.

4. Dans ce rapport on trouve des items comme "moteurs à combustion interne et leurs pièces", etc., etc., montrant les quantités et les valeurs. Dans le cas de "moteurs à combustion interne et leurs pièces" la quantité représente le nombre de "moteurs complets" seulement, et la valeur représente non seulement celle des moteurs complets mais aussi celle de toutes les "pièces" de moteurs; c'est pourquoi, dans cet item et autres semblables, il est impossible d'établir la valeur moyenne par unité.

5. "Imports" signifie "importations entrées pour la consommation". "Entrées pour la consommation" n'implique pas que ces marchandises sont nécessairement consommées au Canada, mais qu'elles ont été livrées à l'importateur qui a payé les droits sur telle partie imposable de ces marchandises.

6. Pour des fins de statistique, la valeur des marchandises importées indiquée dans le présent rapport est celle qui a été déterminée pour fins de droits de douane. Dans la plupart des cas, cette valeur sera la valeur de facture des marchandises, convertie en dollars canadiens au taux autorisé du change. Elle ne comprend pas les frais tels que le fret, l'assurance, la manutention, les droits ou taxes.

7. Les "exportations de produits canadiens" comprennent non seulement les articles d'origine purement canadienne, mais aussi les articles importés d'origine étrangère qui ont été modifiés dans leur forme ou augmentés en valeur par une plus ample transformation au Canada, comme le sucre raffiné après avoir été importé à l'état brut, les articles fabriqués avec du caoutchouc brut importé.

8. La valeur des "exportations de produits canadiens" est le montant réel reçu, exprimé en dollars canadiens, à l'exclusion du fret, des assurances, de la manutention et des autres frais.

9. Les "exportations de produits étrangers" comprennent les "importations entrées pour la consommation" (voir le n° 5 ci-dessus) qui ont été exportées du Canada dans le même état qu'à leur entrée. La valeur est le montant réel reçu, exprimé en dollars canadiens, à l'exclusion du fret, des assurances, de la manutention et des autres frais, quand les marchandises sont exportées du Canada.

10. Les importations au Canada sont attribuées aux pays d'où elles ont été consignées au Canada. Les pays de consignment sont les pays d'où viennent les marchandises, sans autre interruption de transit que les transbordements inévitables. Les pays d'où les marchandises sont consignées ne sont pas nécessairement les pays d'origine, car les marchandises produites dans un certain pays peuvent avoir été achetées par une firme d'un autre pays, d'où elles peuvent être expédiées au Canada après une période plus ou moins longue. Dans ce cas, l'attribution de ces marchandises est faite au second pays, considéré comme pays de consignment. Il en sera ainsi, par exemple, du thé récolté en Orient mais acheté sur le marché de Londres, Angleterre; les statistiques canadiennes considèrent ces importations comme venant du Royaume-Uni.

EXPLANATORY NOTES — Concluded

11. Exports from Canada are credited to the country to which they are consigned, whether that country possesses a seaboard or not. The country of consignment is the country to which goods exported from Canada are intended to pass, without interruption of transit, except in the course of transshipment or transfer from one means of conveyance to another.

12. *Ports.* — The Table of the Trade of Canada, by Ports and Provinces, shows that merchandise was imported or exported at these ports; but this does not imply that goods imported at any port were for home consumption there or even in the province in which the port is situated, neither does it imply that goods exported at any port originated there or even in the province in which the port is situated.

13. The initials "N.O.P." mean "not otherwise provided for".

NOTES EXPLICATIVES — fin

11. Les exportations du Canada sont attribuées au pays où elles sont consignées, même si ce pays ne possède pas de port de mer. Le pays de consignment est le pays que les marchandises exportées du Canada doivent finalement atteindre sans interruption de transit autre que les transbordements inévitables.

12. *Ports.* — Le tableau du commerce du Canada, par port et province, montre les marchandises importées ou exportées par ces ports, mais il n'en faut pas conclure que les marchandises importées par un port quelconque sont pour la consommation de la province où est situé le port, ou que les marchandises exportées sont produites par la province où est situé le port de sortie.

13. Les initiales "n.a.é." signifient "non autrement énuméré"

EXPLANATORY NOTES

1. In all the tables of imports and exports in this report, the quantities and values are based upon the declarations of importers (import entries) and of exporters (export entries), as subsequently checked by Customs officials.

2. Weight, where shown, is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs tariff.

3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

4. In this report are such items as "Internal combustion engines and parts", which show both quantities and values. In these items the quantity represents the number of complete articles only, while the value represents not only the value of the specified number of complete articles but also the value of all kinds of parts of the specified articles; therefore, in such items the average value per unit cannot be ascertained.

5. "Imports" means "Imports entered for Consumption". "Entered for Consumption" does not imply that the goods have been or will be actually consumed in Canada, but that they have passed into the custody of the importer and that duty has been paid on the dutiable portion.

6. For statistical purposes, the value of merchandise imported, as shown in this report, is the value as determined for Customs duty purposes. In most cases, this would be the invoice value of the goods converted to Canadian dollars at authorized exchange ratios. The value does not include charges such as freight, insurance, handling, duties or taxes.

7. "Exports of Canadian Produce" include not only articles of purely Canadian origin but also imported articles of foreign origin which have been changed in form or enhanced in value by further manufacture in Canada, such as sugar refined from imported raw sugar, and rubber goods made from imported unmanufactured rubber.

8. The value of "Exports of Canadian Produce" is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges.

9. "Exports of Foreign Produce" consist of "Imports entered for Consumption" (see no. 5 above), which have been exported from Canada in the same condition as when imported. The value is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges, when exported from Canada.

10. Imports into Canada are classified as received from the countries whence they were consigned to Canada. The countries of consignment are the countries from which the goods have come, without interruption of transit, except in the course of transshipment or transfer from one conveyance to another. The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to Canada. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England; Canadian statistics record such imports as coming from the United Kingdom.

NOTES EXPLICATIVES

1. Toutes les indications de volume et de valeur du présent rapport se fondent sur les déclarations des importateurs et des exportateurs (documents d'importation et d'exportation), subséquemment vérifiées par les fonctionnaires des douanes.

2. Partout où il est question de poids, il s'agit du poids net des marchandises, c'est-à-dire que le poids des emballages ou récipients, n'est pas compris, sauf certaines exceptions énumérées au tarif des douanes.

3. L'expression "ton" signifie 2,000 livres et "cwt." (ou quintal) 100 livres avoirdupois. Les autres unités de quantité indiquées se fondent sur les étalons impériaux.

4. Le rapport renferme des items comme "moteurs à combustion interne et leurs pièces" et en donne la quantité et la valeur. La quantité de ces items n'est que le nombre d'articles complets tandis que la valeur est celle non seulement d'un nombre déterminé d'articles complets mais aussi des pièces de tous genres des articles déterminés; il est donc impossible d'établir la valeur unitaire moyenne de ces items.

5. "Importations" signifie "importations entrées pour la consommation". "Entrées pour la consommation" n'implique pas que ces marchandises sont nécessairement consommées au Canada, mais qu'elles ont été livrées à l'importateur qui a payé les droits sur telle partie imposable de ces marchandises.

6. Pour des fins de statistique, la valeur des marchandises importées indiquée dans le présent rapport est celle qui a été déterminée pour fins de droits de douane. Dans la plupart des cas, cette valeur sera la valeur facturée des marchandises, convertie en dollars canadiens au taux autorisé du change. Elle ne comprend pas les frais tels que le transport, l'assurance, la manutention, les droits ou taxes.

7. Les "exportations de produits canadiens" comprennent non seulement les articles d'origine purement canadienne, mais aussi les articles importés d'origine étrangère qui ont été modifiés dans leur forme ou augmentés en valeur par une plus ample transformation au Canada, comme le sucre raffiné après avoir été importé à l'état brut, les articles fabriqués avec du caoutchouc brut importé.

8. La valeur des "exportations de produits canadiens" est le montant réel reçu, exprimé en dollars canadiens, sauf les frais de transport, d'assurance, de manutention et autres.

9. Les "exportations de produits étrangers" comprennent les "importations entrées pour la consommation" (voir le n° 5 ci-dessus) qui ont été exportées du Canada dans le même état qu'à leur entrée. La valeur est le montant réel reçu, exprimé en dollars canadiens, à l'exclusion des frais de transport, d'assurance, de la manutention et autres, quand les marchandises sont exportées du Canada.

10. Les importations au Canada sont attribuées aux pays d'où elles ont été expédiées au Canada. Les pays d'expédition sont les pays d'où viennent les marchandises, sans autre interruption de transit que les transbordements inévitables. Les pays d'où les marchandises sont expédiées ne sont pas nécessairement les pays d'origine, car les marchandises produites dans un certain pays peuvent avoir été achetées par une firme d'un autre pays, d'où elles peuvent être expédiées au Canada après une période plus ou moins longue. Dans ce cas, l'attribution de ces marchandises est faite au second pays, considéré comme pays de consignment. Il en sera ainsi, par exemple, du thé récolté en Orient mais acheté sur le marché de Londres (Angleterre); la statistique canadienne considère ces importations comme venant du Royaume-Uni.

EXPLANATORY NOTES — Concluded

There is one exception to this rule. Imports of goods of Central or South American origin which are consigned to Canada from the United States are classified as received from the country of origin of the goods, rather than from the United States.

11. Exports from Canada are credited to the country to which they are consigned, whether that country possesses a seaboard or not. The country of consignment is the country to which goods exported from Canada are intended to pass, without interruption of transit, except in the course of transshipment or transfer from one means of conveyance to another.

12. *Ports.* — The tables of the trade of Canada, by ports and provinces, show that merchandise was imported or exported at these ports; but this does not imply that goods imported at any port were for consumption there or even in the province in which the port is situated, neither does it imply that goods exported at any port originated there or even in the province in which the port is situated.

13. The initials "N.O.P." mean "not otherwise provided for".

NOTES EXPLICATIVES — fin

Il existe une exception à cette règle. Les importations de marchandises en provenance de l'Amérique centrale ou de l'Amérique du Sud et expédiées des États-Unis au Canada sont classées comme reçues du pays de provenance plutôt que des États-Unis.

11. Les exportations du Canada sont attribuées au pays où elles sont expédiées, même si ce pays ne possède pas de port de mer. Le pays d'expédition est le pays que les marchandises exportées du Canada doivent finalement atteindre sans interruption de transit autre que les transbordements inévitables.

12. *Ports.* — Les tableaux du commerce du Canada, par port et province, montrent les marchandises importées ou exportées par ces ports, mais il n'en faut pas conclure que les marchandises importées par un port quelconque sont pour la consommation au port ou dans la province où est situé le port, ni que les marchandises exportées proviennent du port ou de la province où est situé le port.

13. Les initiales "n.a.é." signifient "non autrement énuméré"

Articles destinés à être utilisés exclusivement dans la métallurgie ou la fusion du fer, à savoir: machines et appareils pour agglomérer et mouler en nodules, concentrées ou non, le minerai de fer ou la poussière ferrifère; machines et appareils devant servir exclusivement à la construction, l'aménagement ou la réparation d'un haut fourneau pour la fusion du minerai de fer, ces machines et appareils devant comprendre des appareils à air chaud et des brûleurs, des tubes et des valves à vent chaud reliant les machines soufflantes au fourneau, des wagons-bascule, des appareils de chargement et de montage, des conduites à gaz pour les hauts fourneaux, des nettoyeuses et des lavoirs; et les pièces de toutes machines susmentionnées, à l'exclusion des tuyaux de fer forgé ou des valves de 10 1/2 pouces ou moins de diamètre, et des pièces de construction en fer. (5461)						
Blowers of iron or steel, for use in the smelting of ores, or in reduction, separation or refining of metals, ores or minerals; rotary kilns, revolving roasters and furnaces of metal, designed for roasting ore, mineral rock or clay; furnace slag trucks and slag pots, and parts of all the foregoing.						
Souffleries de fer ou d'acier, pour servir au grillage des minerais ou à la réduction, la séparation ou l'affinage des métaux, minerais ou minéraux; fours rotatifs, grilleurs et fourneaux tournants pour les métaux, destinés au grillage du minerai, des minéraux, roches ou argile; chariots à scories de fourneaux et poches à scories, et les pièces de tous les articles susmentionnés. (5462)						
Buddles, vanners, slime or concentrating tables and parts thereof, for use in mining and metallurgical operations.						
Lavoirs, vannoirs et pans ou tables de concentration et leurs parties pour servir dans les opérations de mine et de métallurgie. (5463)						
Car loading machines and complete parts thereof for use exclusively for loading coal into box cars.						
Chargeuses mécaniques et pièces complètes de ces machines pour servir exclusivement au chargement de la houille dans des wagons fermés. (5464)						
Chock release apparatus, for use in coal mines to facilitate the safe removal of chocks forming the roof support.						
Appareils de décalage, pour servir dans les mines en vue de faciliter l'enlèvement sûr des cales constituant le support du toit. (5465)						
Coal-heading machines; electric or magnetic machines for concentrating or separating iron ores; automatic scales for use with conveyors, and parts of all the foregoing, for use exclusively in mining or metallurgical operations.						
Excavateurs de houille; machines électriques ou magnétiques pour concentrer ou séparer le minerai de fer; balances automatiques devant servir avec les convoyeurs, et les pièces de toutes les machines susmentionnées, ne devant servir que dans les opérations minières ou métallurgiques. (5466)
